Rakibul Islam Tusar

.NET Software Developer

Dhaka, Bangladesh rakibulislamtusar7@gmail.com github.com/Rakibul-Islam-Tusar linkedin.com/in/rakibul-islam-tusar68472b342

PROFESSIONAL SUMMARY

.NET Software Developer at Symphony Softtech Ltd. experienced in building and maintaining enterprise business applications. Skilled in translating complex operational requirements into reliable, maintainable software across order management, ERP workflows, database operations, pricing, reporting, data migration, and production support.

PROFESSIONAL EXPERIENCE

.NET Software Developer
Jun 2026 – Present

Symphony Softtech Ltd. · Dhaka, Bangladesh

Promoted to contribute to enterprise software development, business workflow implementation, database-driven applications, system enhancements, and production support.

- Enterprise application development with ASP.NET MVC and ASP.NET Core
- SQL Server data access and business logic implementation
- Application maintenance, troubleshooting, and production support

Junior Software Developer
Apr 2025 – May 2026

Symphony Softtech Ltd. · Dhaka, Bangladesh

Promoted from Software Developer Intern after three months. Contributed to new features, issue resolution, SQL Server integration, and ongoing enterprise application maintenance.

- Feature development across UI and backend workflows
- Bug fixing, debugging, and database integration

Software Developer Intern
Jan 2025 – Mar 2025

Symphony Softtech Ltd. · Dhaka, Bangladesh

Gained practical experience with ASP.NET applications, SQL Server databases, debugging, and collaborative professional development workflows.

ASP.NET Scholarship Intern
Apr 2024 – Dec 2024

US Software Limited · Dhaka, Bangladesh

Completed an ASP.NET-focused scholarship internship covering C#, ASP.NET web applications, SQL Server, and practical software development workflows.

Industrial Attachment Trainee
Aug 2023 – Nov 2023

TactSoft · Dhaka, Bangladesh

Completed an industrial attachment focused on practical software development exposure, professional IT workflows, and industry-oriented learning.

Frontend

JavaScript, jQuery, Kendo UI, Razor Views, Bootstrap, HTML5, CSS3

Tools & Systems

IIS, Git, Crystal Reports, Inno Setup, Visual Studio, Windows

EDUCATION

Diploma in Engineering

Computer Technology

Shariatpur Polytechnic Institute

Completed: December 2023

CGPA: 3.13 / 4.00

CORE STRENGTHS

Business Workflows | Feature Development | Debugging | Production Support | Data Migration | Reporting

> **Career progression:** Intern → Junior Software Developer → .NET Software Developer through two promotions at Symphony Softtech Ltd.

Selected Projects

Enterprise and Database-Driven Business Applications

TAILORING OPERATIONS

Fit Elegance — Tailoring Management System

Contributed to order creation and editing, multi-column fabric selection, configurable pricing, discount and VAT calculations, delivery-date logic, and print-ready documents.

- Supported migration of approximately 3,000 fabric records
- Contributed to member and branch data migration
- Stack: C#, ASP.NET MVC, SQL Server, Kendo UI, jQuery

ERP WORKFLOW

Fixed Asset & CAPEX Management

Developed workflow and validation features supporting approved-budget checks, acquisition references, asset registration, employee assignment, and transfers.

Technologies: C#, SQL Server

BUSINESS APPLICATION

Distribution Management System

Contributed to feature development and maintenance for database-driven order workflows, validation, troubleshooting, and production improvements.

Technologies: ASP.NET, SQL Server

ENTERPRISE RESOURCE PLANNING

Construction ERP

Contributed to structured business operations and database-driven project workflows, including BOQ management, work orders, material requisitions, and project operations.

ADDITIONAL PROJECT EXPOSURE

Other Business Systems

Point of Sale (POS) System, Hospital Management System, and Education Management System.

PROFESSIONAL FOCUS

Solving real business problems, understanding complex operational workflows, improving existing systems, and developing maintainable software solutions across the full application lifecycle—from interface and business logic to database operations and production delivery.
